

I CLAIM:

1. A card device comprising:
a board member, and
at least one antenna device printed on said board member, said
5 at least one antenna device including an S-shaped structure.

2. The card device as claimed in claim 1, wherein said at least
one antenna device includes a conductor provided around said
S-shaped antenna device to form an S-shaped hollow space in said
at least one antenna device.

10 3. The card device as claimed in claim 1, wherein said board
member includes a transmission circuit provided thereon, and said
at least one antenna device includes an output terminal coupled to
said transmission circuit.

15 4. The card device as claimed in claim 1, wherein said at least
one antenna device includes a peripheral segment having two
openings formed therein and each defined by two ends, and a link
segment coupled between two of said ends of said peripheral
segment to form said S-shaped structure.
